

Software Requirements

For the Google Colab workshop during FOSSCON INDIA 2019, participants need computers/laptops with good internet facility. No specific software installation is required for the workshop.

However, every participant must complete following steps to save data in their google drive.

Download the data-set by [visiting the Dogs vs. Cats Data page](#) and click the “*Download All*” button.

This will download the 850-megabyte file “*dogs-vs-cats.zip*” to your computer.

After unzipping the folder, participants are requested to save minimum 750 images of cats (cat.0.jpg to cat.749.jpg) and 750 images of dogs (dog.0.jpg to dog.749.jpg) from the 'train' folder and 500 images (1.jpg to 500.jpg) from 'test1' folder to your google drive by logging into gmail. Participants are requested to follow instructions to upload files and folder to google drive given here:
