

## Software Requirements

Salome software installation is as below.

1. Open the Official Salome download website in your browser.  
<https://www.salome-platform.org/downloads/current-version>
2. Under Binaries for officially supported Linux platforms, depending on the version of Ubuntu click on Linux Ubuntu 14.04 64-bits or **Linux Ubuntu 16.04 64-bits** which the download the package.
3. Once download is completed extract the contents by right clicking on it.
4. Keep the extracted salome folder in the location you want. (preferably home directory)
5. Open the terminal by typing **Ctrl+Alt+T**
6. Type the following command to go home directory  
**cd ~**
7. Type the following command depending on the version  
**cd SALOME-8.4.0-UB14.04-SRC or**  
**cd SALOME-8.4.0-UB16.04-SRC**
8. Now type following command to open the Salome GUI  
**python salome**

(Ignore the background warning comes in the terminal)
